DECLARATION

We hereby declare that this project report is based on our original work except for citations and quotations which have been duly acknowledged. We also declare that it has not been previously and concurrently submitted for any other degree or award at Bahria University or other institutions.

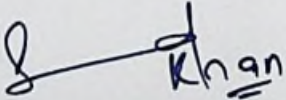

Name : M. Athar Akbar

Reg No. : 60049

Signature :  _____

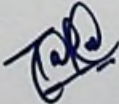

Name : M. Saad Uz Zaman Khan

Reg No. : 60005

Signature :  _____

Name : Taha Abdul Aziz

Reg No. : 59994

Signature :  _____

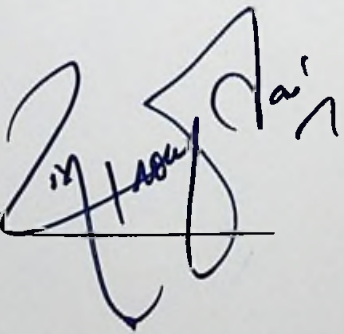

Date : 12^m Jan '23

APPROVAL FOR SUBMISSION

We certify that this project report entitled “KHAREED – O – FAROOKHT” was prepared by M. Athar Akbar, Taha Abdul Aziz, and M. Saad Uz Zaman Khan has met the required standard for submission in partial fulfilment of the requirements for the award of Bachelor of Science in **Computer Science** at Bahria University.

Approved by,

Signature: _____

A handwritten signature in black ink, appearing to read 'Saad Uz Zaman Khan', written over a horizontal line. The signature is stylized and includes a large, looped initial.

Supervisor: Sir M. Marouf

Date: _____

ACKNOWLEDGEMENT

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express our gratitude to our research supervisor, Sir Marouf for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, we would also like to express our gratitude to our loving parents and friends who had helped and given us encouragement.

KHAREED-O-FAROOKHT

ABSTRACT

An e-commerce app is a software application that allows users to browse and purchase products or services over the internet. Such application will keep central records of different products. User using the application can see a large number of different products from different vendors just like physical shopping. Managing inventory, for the store owner becomes easier as customers can visit the application and order online. An ecommerce mobile application is a platform where the users and vendors can easily buy or sell any types of products online. This application saves both time and travel costs for customers. The user can select a product he likes and view its price and also compare it with other vendors, as a comparative statement will be generated. The customer can search their particular product on this application. When the customer selects the product, he will add it to his cart. after selecting the product, the customer will add it to the add cart and select his address from map. The customer can login his account with his details and the new customer can create his new account very fast. They must give their details of their name, contact number and mailing address and they will get an OTP through email which they can use to login. The vendor can add, delete product details whereas the admin can remove or add the seller by authorizing them.
