ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my project supervisor, Mr. Jawad Ahmed Bhutta for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, we would also like to express our gratitude to our loving parents and friends who have helped and given us encouragement.

STOREYOURSTOCK.COM

ABSTRACT

The main idea of our webapp is to make an online platform that understands the capacity issues confronted by businesses and organizations and gives detached wage to people who have free space at homes. The stage can be utilized for frozen items, crockery, clothing, electronic items and others. It'll offer an arrangement for businesses and organizations that require extra capacity space for excess products. Our webapp will provide arrangements by bringing businesses and organizations along side individuals. In expansion, the webapp will offer arrangements for storing vehicles such as cars, bikes, buses, within the vacant space at home/parking lots. Platform consists of proper implementation of the KYC. In expansion, our group is continually working to guarantee that the webapp is effective and successful, providing an ideal solution faced by businesses and a source of income for individuals. Moreover, we conducted surveys from different markets to learn about their opinions and thoughts about our project idea. The major point of our project is to solve the primary storage issue often experienced by numerous businesses and organizations in cities like Karachi. With the emerging need for storage spaces, it has gotten to be necessary to supply an online platform stage that interfaces businesses with people who have sufficient space available. Not only it understands the storage issues of the businesses, it also gives individuals the opportunity to gain extra cash from renting unused space. Our goal is to eliminate the gap between capacity request and supply and eventually make esteem for all partners.
