## ABSTRACT

The feasibility report is feasible to start a *LPG Filling Station* business. This report shows the growth of economic and shortage of *CNG* day by day. This project does not need much time in starting since no such building or site needs construction except office building. The business can be made operational within eight to twelve months, but a proposed one month non operating period will be observed in order to get the necessary equipment and office. In order an office setup a month time period is sufficient which will include buying of necessary equipments, the furniture for the office and the hiring of employees.
